GOVERNMENT REGULATION FOR OUR GRANITE MANUFACTURING PLANTS

Should the Ventilating System of Our Granite Manufacturing Plants Become Subject to Government Regulation?

This question often presents itself in the course of conversation among granite manufacturers, and the problem is far from being solved. Meanwhile good men are gradually becoming disabled and passing to the great beyond. The manufacturers are willing and anxious to procure better ventilating systems that will become practical. They know only too well the danger that a man encounters when he works in a shed that is destitute of any method or means of ventilation and they manfully meet the situation and spend thousands and thousands of dollars to protect their employees. Everybody with the right public spirit is on the lookout for the advancement of mechanical and human agencies for the health, happiness and comfort of the workman.
